daniel70.netlify.app | github.com/PiggyDan | linkedin.com/in/dolgion-o

Systems engineer responsible for the infrastructure of a group of **about 11 companies**: Dell PowerEdge servers, VMware ESXi, Check Point firewall and VPN, networking, CCTV/NVR and end-user IT. Currently leading the group's ERP migration from **Odoo 13 to Odoo 19 Community** (in progress), and the builder of **IT Core** (itcore.dev), a multi-company help desk SaaS. I troubleshoot from the user's screen down through application, database, network and firewall layers.

~11 companies
Infrastructure I'm responsible for, servers to desktops

Odoo 13 → 19
375 modules audited · migration in progress

IT Core SaaS
Live at itcore.dev · 90+ releases in first 4 weeks

EXPERIENCE

System Engineer & IT Manager
Apr 2026 — Present

Govikhangai Khudulmur LLC · group of ~11 related companies

- Responsible for infrastructure, networking, security, virtualization, ERP and end-user IT across the group.
- Run **Dell PowerEdge R740 / R750** servers on VMware ESXi: disk replacement, OS reinstalls, host health.
- Manage Check Point firewall, Remote Access VPN, NAT, routing, **Grandstream GWN** Wi-Fi via GWN.Cloud, IP telephony and **CCTV/NVR**.
- Leading the in-progress **Odoo 13 → 19 Community migration**: audited 375 module manifests (~225k-line dependency chain); porting 15 custom modules and testing them on a separate Ubuntu 24.04 test server.
- Built **gkllc.mn**: vacancies publish straight from Odoo and CV uploads land in HR through a custom jobs API.

IT Specialist
Mar 2025 — Mar 2026

KFC / Tavan Bogd Foods LLC · multi-branch restaurant network

- Kept branch servers, POS terminals, self-service kiosks and back-office systems running.
- Set up **Macromatix** (inventory, ordering, reporting) from the start: initial data import, configuration and user accounts; then ran it, fixing data and report problems.
- Supported **r_keeper** POS; installed new CCTV cameras and reset and restored NVR recorders.

IT Specialist
Nov 2024 — Mar 2025

Ayenix LTD · short-term role

- Helped set up the company's new server and brought 100+ computers onto it; handled day-to-day support.
- Designed the company website, tredero-ai.com (no longer online).

IT Support
2022 — 2024

Bayan-Airag Exploration LLC

- Provided hands-on IT support in a remote mining operation across endpoints, network and office systems.
- Supported business users and infrastructure while building practical production troubleshooting experience.

SKILLS

Infrastructure

Dell PowerEdge R740/R750 · VMware ESXi · Windows Server · Ubuntu / Linux · SSD / HDD · CCTV / NVR · r_keeper POS · Macromatix

Networking & Security

Check Point · Grandstream GWN.Cloud · VPN · NAT · Routing · TCP/IP · DNS · DHCP · Wi-Fi · nginx · UFW · TLS · Nmap · Wireshark

ERP & Backend

Odoo 13 → 19 · Python · PostgreSQL · REST APIs · Node.js · JSON

Development & DevOps

React · Next.js · TypeScript · JavaScript · Electron · Cloudflare Workers · Docker · Git · GitLab · PowerShell · Bash

EDUCATION

Computer Science
Mongolian International University
University studies — 4 years

PRODUCTS & PROJECTS

IT Core — IT help desk & device-inventory SaaS

itcore.dev · sup.itcore.dev · Founder & engineer · 2026

- Founded, designed and built a **multi-company help desk platform**: tickets with attachments, chat and group chat, announcements with read receipts, knowledge base, technician reports and automatic invoices in USD, MNT and CNY.
- Shipped a **self-updating Windows desktop app** (Electron) with an offline Call-IT button, plus the **ITCore Sentinel** agent (Go) — token-based device enrollment and health telemetry, never remote commands.
- Tenant isolation, 4 roles, scrypt, HttpOnly sessions, CSRF checks and rate limits covered by integration tests; 90+ releases in the first 4 weeks; MN / EN / ZH.

React · Vite · Cloudflare Workers · Neon PostgreSQL · R2 · Electron · Go · Node.js

ERP 19 — Odoo 13 → Odoo 19 migration

- Audited 375 module manifests and isolated the 46 third-party modules actually in use; flagged Enterprise-only code, the hr_contract merge and removed legacy JS APIs as blockers.
- Porting HR, timetable, salary, stock, transport, accounting and maintenance modules; added a branded login/home screen and a jobs API for the public website.
- Odoo 19 test server on Ubuntu 24.04 with nginx reverse proxy, UFW firewall, Let's Encrypt TLS and a scripted hardening playbook, plus a separate PostgreSQL 16 test database server.
- *Status: in progress. Odoo 13 is still production; data validation and cutover are planned.*

Odoo 19 · Python · PostgreSQL · OWL · Ubuntu 24.04 · nginx · GitLab

InfraScope — open-source infrastructure monitoring

github.com/PiggyDan/infrascope · MIT · 2026

- HTTP(S) monitor that stores real response times in PostgreSQL and opens/resolves incidents automatically (2 failures to open, 2 successes to resolve).
- SSRF-safe target policy, hashed API keys with VIEWER/ADMIN roles, HMAC-signed incident webhooks with an outbox and retries.
- Docker Compose stack; GitHub Actions CI runs lint, 141 pytest tests on PostgreSQL, frontend build and a Compose end-to-end check.

Python · FastAPI · PostgreSQL 16 · Alembic · Docker Compose · GitHub Actions · React · TypeScript

Weighbridge → ERP integration

- Workflow that imports weighbridge data directly into ERP without manual spreadsheet editing, with API-based automation as the target architecture.

Odoo · REST API · Validation

WEBSITES

- **Manlai Trading** (manlaitrading.com) — client project: Korean car import platform with search, KRW/MNT pricing, import cost calculator and customer accounts. *Next.js, Vercel*
- **gkllc.mn** — corporate site whose job listings come from the ERP; CV uploads flow into Odoo HR. *React, Vite, Odoo API*
- **Paul's Home Repair** — bilingual service site with booking calendar, chat assistant and admin dashboard. *Next.js, Upstash Redis, Vercel*
- **JK Mechanic Shop — Garage 84** — workshop website with a companion mobile app. *React, Expo*

HOW I WORK

Whole-stack troubleshooting
From the user's screen to the firewall — no "not my layer".

Own it end to end
Diagnose, fix, document and prevent the repeat.

Automate the boring parts
Replace spreadsheets and manual steps with tools people actually use.
