

PROFILE

System Engineer with hands-on experience supporting production infrastructure across multi-company environments. Experienced in networking, Windows/Linux systems, VMware, Check Point security, Odoo ERP, PostgreSQL and technical troubleshooting. Expanding into DevOps, API integrations and full-stack engineering, with the ability to investigate issues from user and application layers through network, firewall and server infrastructure.

CORE SKILLS

Infrastructure	Windows / Windows Server, Ubuntu / Linux, VMware / ESXi, servers, endpoints
Networking & Security	TCP/IP, DNS, DHCP, VPN, NAT, routing, Check Point Firewall, Nmap, Wireshark
ERP & Backend	Odoo ERP, Python, PostgreSQL, REST APIs, JSON, data import and integration
Development & DevOps	Git, GitHub, GitLab, PowerShell, Bash, Docker, JavaScript, TypeScript, React / Next.js

PROFESSIONAL EXPERIENCE

System Engineer | 2026 — Present

Govikhangai Khudulmur LLC

- Support IT operations across approximately 11 related companies, covering infrastructure, networking, security, ERP, virtualization and end-user systems.
- Operate and troubleshoot Windows/Linux environments, servers, VMware/ESXi, network services and business-critical applications.
- Manage Check Point firewall, Remote Access VPN, NAT, routing, Wi-Fi, printers, CCTV/NVR and IP telephony infrastructure.
- Work with Odoo ERP, PostgreSQL, Python, Git and internal data/integration workflows.
- Own incidents end-to-end across user, application, database, OS, network, firewall and infrastructure layers.

IT Specialist | 2024 — 2026

KFC / Tavan Bogd Foods LLC

- Provided operational IT support in an enterprise environment focused on availability of user-facing and business systems.
- Troubleshot workstation, software, hardware and connectivity incidents under operational time pressure.

IT Role | 2024

Ayenix LTD

- Worked in an IT role supporting day-to-day technology operations and technical troubleshooting.

IT Support | 2022 — 2024

Bayan-Airag Exploration LLC

- Provided hands-on IT support in an operational mining environment across endpoint, network and office systems.
- Supported business users and infrastructure while building practical production troubleshooting experience.

SELECTED ENGINEERING WORK

Odoo ERP Development & Integration — Odoo 13, Python, PostgreSQL, custom modules, imports, troubleshooting and business-process improvements.

Weighbridge to ERP Integration — Workflow for importing weighbridge data directly into ERP without manual spreadsheet editing, with API-based automation as the target architecture.

Infrastructure & Network Operations — Production work with Check Point, VPN, NAT, routing, VMware, Linux, Windows and network/service troubleshooting.

EDUCATION

Computer Science — Mongolian International University
University Studies — 4 Years

CURRENT DEVELOPMENT FOCUS

DevOps automation, TypeScript, React, Next.js, Node.js, Docker, API integration and production-quality full-stack applications.
